

CALCIUM SCALE PREVENTION

Discover the benefits of our entire family of products for your corrugating operation.

✓ Biocides

- JT-1 Preservative
- JT-20 Corrosion Inhibitor
- Green Preservative
- Liquid Green Preservative
- Aquakill-5 Quick-Kill Biocide

✓ Clean Tank HP

✓ Walla Penetrant

✓ Foam-X

✓ Odor-X

✓ Process Water Treatment

- Chemistry (liquid and dry)
- Systems
- Service

CAL-STOP

PRODUCT DESCRIPTION

CAL-STOP will keep inorganic deposits from precipitating out and bonding to glue rolls by inhibiting the growth of large calcium carbonate crystals. Calcium carbonate crystal deposits cause the scale seen on glue rolls from hard water or the use of wastewater in making corrugating adhesive. CAL-STOP can also be used in water treatment systems to keep hard water deposits from building up in pipes and on equipment.

SUPER – CONCENTRATED

Only 7 parts per million of CAL-STOP can keep 200 parts per million of calcium carbonate dispersed in the adhesive and greatly limit scale build up. Only 8 – 12 ounces per 700 gallons of adhesive

CAL-CLEAN

PRODUCT DESCRIPTION

CAL-CLEAN is specifically designed to dissolve the toughest hard water scale, lime, and rust deposits from corrugator glue rolls and other equipment. This powerful liquid is non-toxic, non-flammable, non-hazardous, non corrosive and biodegradable. This means that CAL-CLEAN will not harm box plant personnel, equipment or the environment. CAL-CLEAN is the solution to your water scale build-up!

REUSABLE SOLUTION

CAL-CLEAN is dispensed directly into an empty starch pan and allowed to soak for a few hours. Then, return CAL-CLEAN to the original drum or rinse down the drain, and wash off the glue rolls with running water. Available in 55-gallon Drums and 305-gallon Totes.

PRODUCT FEATURES

USDA Approved: CAL-CLEAN is approved by the USDA and the FDA for use in food, beverage, bottling, & pharmaceutical processing plants – making it fully approved for your box-plant!

Biodegradable: CAL-CLEAN is biodegradable, so waste disposal is not a problem. Even in Concentrated form, CAL-CLEAN may be flushed down normal plant sewers.

Fast, Simple & Effective: Most equipment will be thoroughly cleaned in just a few hours – without labor intensive scrubbing or acid washes.
